TEMPORARY CROWN

- Brush as normal. To floss, pull down as you normally would, but do not pull up as this may loosen the temporary crown. Simply pull floss through by one side.
- Keep from chewing sticky things such as gum or candy. Also hard, crunching food may break may or crack at temporary crown.
- If temporary does come off, apply a small amount of Vaseline or denture adhesive into temporary and slide back into place. Call the office to make an appointment to recement temporary back on.
